

September 15, 2018

Dear Board Members, Employees and their family members, Shareholders, and Partners,

The purpose of this letter is to publicly call upon all interested parties of Link Motion Inc. (Formerly NQ Mobile Inc.) to know my position on the current state at this Company. I have always made a commitment with respect to my employment at Link Motion. Regardless of how difficult or challenging, I would ALWAYS do my very best for the Company and the shareholders as long as two principles applied 1) that the Company and its people did the right things and did so with integrity and 2) I believed in the future and a positive outcome. As long as those two core principles remained, I would always do my very best to stand up for and fight on behalf of the Company and its shareholders. Even though at many steps along the way, resigning would have been the easiest choice, I never make decisions based upon the ease of the way, rather I make decisions based upon my core values and principles. Up until this point, even under the most challenging and craziest circumstances imaginable, I remained confident and comfortable that those two principles remained in tact.

Today I must stand up and fight for the Company in a different way. Let me be clear, this has nothing to do with any of the craziness associated with the personal battle between Henry and Vincent. We investigated those matters and the conclusions were reached and disclosed in a 6K filing on September 10th. Those issues are really just a nasty personal dispute between two people and the nature of that has reached insane levels. However, none of that changed my two core principles. This is not about a "Henry vs Vincent" opinion. Rather, I must stand up and fight for the Company and make everyone aware that I do not agree with or support the decisions being made by Vincent with respect to the convertible note. I will not go along with it and I will do everything I can to fight it and invalidate it. I fully support Larry Chi and China AI. I will try and work together with them and do everything possible to ensure that the current decisions being led by Vincent with regards to the convertible note are not taken. I am calling on the board of directors to take the bold and necessary actions to ensure that every action is in the full and honest interest of its shareholders, even if that means removing Vincent for a period of time while he settles his personal dispute with Henry. In fact, I strongly suggest that is in the best interest of the Company and its shareholders. Vincent should either step down, or be removed, so that the Company can move forward.

With regards to the convertible note, we are working with the holder to negotiate an extension of maturity. This is mutually beneficial and something that all parties support. However, without a formal and written extension agreement, I will not support and stand by Vincent's decision to offer an additional pledge of assets unless such an extension is reached in conjunction. We must not allow an additional pledge to be made without an agreement in place on the extension terms. To be clear to the public, it is not being discussed to lower the conversion price, rather this is a simple extension of maturity. I fully support this action, and I fully support pledging additional assets as collateral if this benefit for both parties is made at the same time. However, we must not pledge these additional assets without first having the extension also finalized. I will fight for the Company and its shareholders. I hope to work together with China AI to ensure that this is resolved in a way that works for the Company's and its shareholders interests.

Obviously, I call upon the board of directors to immediately meet to take the necessary actions to ensure this outcome benefits the Company and its shareholders.

With Passion and Determination,
Matt Mathison
